KINETIC^{IS5}

ENJOY SEATING PERFORMANCE.

OFFICE. DYNAMICS. STAND UP FOR MORE FLEXIBILITY.

Stand up for more flexibility. Life is movement, right from the start. Initially, a small step, later it might be a giant leap. Without activity, there is no thought, no experience. Every child learns this. Without focused curiosity, there are no questions and no answers – the most important driving force behind our doing. Learning is never passive, thinking is not an abstract activity disconnected from the body. Especially, nowadays developing ideas means one thing above all: movement, both intellectual and physical, because it's good for you and keeps your mind and body active. Movement changes us, stimulates our performance, concentration and motivation. So, office spaces are above all spaces for movement. More than this, spaces for movement and cooperation. This is why we created KINETIC¹⁵⁵, enhancing a new world of work full of movement and dialogue. It is not because we believe that movement is an end in itself, but rather, that there is evidence which suggests that movement leads to the final goal.

Instantly understood. The maxim of modernity: reduction of form to its essentials, aesthetic distinctiveness, and a determined aspiration to perfection – in terms of functionality just as much as materials. The result: products that retain their value and that will last and last. The KINETIC¹⁵⁵ range fits into this tradition of sophisticated, functional design, a design that has one particular wish – to be thoroughly user-friendly. You immediately understand what you see and intuitively operate what you need: the hidden integrated controls make each member of the family a product that is instantly understood, one that invites everyone who is looking for inspirational interaction.

739K

Classic elegance. Form always represents the possibility of logic. Without logic that consistently follows the task, there cannot be a responsible and durable product, that has functional credibility, omits everything superfluous, serves and impress people. If you then add a precise finish and aesthetic distinctiveness, you finally reach true enthusiasm. This logical minimalism is one of the distinguishing features of the work of Phoenix Design, and similarly it is one of the features that sets the appearance of the KINETIC^{ISS} family. So, KINETIC^{ISS} is part of the tradition of classic design – awarded the reddot for its outstanding design.

honourable mention 2013

So much more than something to catch the eye in the office: the stool is the archetypal form of all seating, the first introduction to the world of seating. It stylishly unites opposites, it stands for both tranquillity and action, for concentration and movement. You feel freer when you sit on a stool; always ready to jump up with the next new idea. This makes the other contrasting expectations all the greater. It must be flexible enough to enable people to have spontaneous conversations while at the same time providing great practical features and design. So the KINETIC^{ISS} – bridge element in three different sizes adapts perfectly to any room situation, and thanks to the full range of electrification options, creates the ideal basis for discussion at any time. In terms of design, KINETIC^{ISS} effortlessly adapts itself to any space. All the wooden elements are available in black, white, oak or American walnut. All this means that bar stools and bridge element are furniture that can be used anywhere at all, as if specially created for every office where there is a distinctive culture of dialogue.

Bar stool with footrest

Bar stool without footrest,
Height adjustment using recessed handle

Elegant, stable base

High-quality materials characterise the charismatic appearance of KINETIC^{IS5}. It plays with colour and touch-and-feel. The metal parts are available in black, brilliant silver, white or in tangibly classy blasted aluminium versions.
