Attenuation Absorption

Domo

Design Stefan Borselius

Den eleganta fasningen ger serien ett enhetligt helhetsintryck. Golvskärmen kan användas för att skapa avskilda ytor i en miljö.

The elegant bevelling gives the series a uniform overall impression. The floor screen can be used to create separate spaces in an environment.

Raka eller runda hörn, olika färger på in- och utsida. Skärmen består av en ljudabsorberande fyllning, monterad inuti en solid träram klädd med textil.

Rounded or straight corners, different colours for the inside and outside. The table screen consists of a sound-absorbent filling mounted within a solid wood frame upholstered in fabric.

En klassisk skärm som tillåter detaljerna att framträda. De fasade kanterna ger skärmen en självklar elegans.

A classic screen that lets the details speak for themselves. The bevelled edges lend the screens a natural elegance.

Passar utmärkt att kombinera med andra produkter från Domo-serien; bordsskärm, förvaring, väggbås och väggabsorbent!

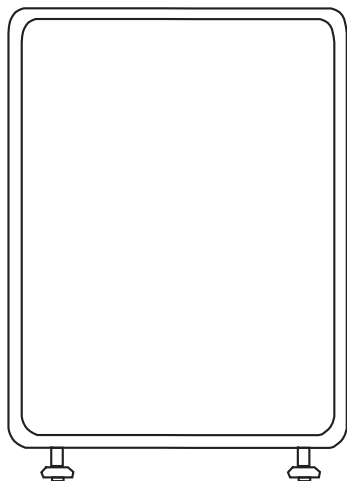

Ideal to combine with other products from the Domo series; table screen, wall booth, storage and wall absorber!
