

# PILE TABLE

enea

BY Estudi Manel Molina

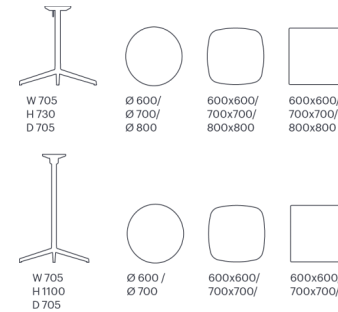

## Structures

- Four support bar base in polished aluminium or lacquer with anti-slip pads, attached to base column with guaranteed attachment mechanisms.
- 60mm extruded aluminium tubular column.
- Countertop support with its own folding mechanism in synthetic fibers.
- Base heights of 73 and 110 cm.
- Tabletops in 600, 700 and 800cm diameters, in HPL or Fenix.

## Certificates

Eco-design product under order UNE-EN ISO 14006

## Measures

## Accessories

- Trolley
- Levelling leg

The best of both worlds: A range of tables designed with exceptional functionality in mind, without compromising form. The specially designed Pile base looks great and provides total

stability, while the unique folding mechanism allows these tables to be effortlessly folded and stored, making the Pile range perfect for demanding, dynamic environments - both indoor and out.
