DESIGN BY LUCIANO BERTONCINI, 2011

Prima di essere un tavolo, Thin-K è una sfida tecnologica e formale. Ai limiti del minimalismo assoluto, il piano di Thin-K è spesso appena 6 mm e può raggiungere lunghezze considerevoli senza perdere linearità e solidità, sottile al punto da sembrare sospeso in aria. Disegnato da Luciano Bertocini, Thin-K è realizzato totalmente in metallo, con particolari esterni delle gambe e piano in alluminio, vetro lucido o opaco e alluminio impiallacciato in essenza – materiali resistenti, duraturi e completamente riciclabili. La finitura gofrata del piano in alluminio lo rende liscio e piacevole al tatto. Fisso o allungabile, il tavolo Thin-K è disponibile in diversi colori.

Thin-K can be considered more of a technological and formal challenge than a table. At the limits of sheer minimalism, the top of Thin-K is just 6mm thick and can extend to considerable lengths without losing its linearity and sturdiness. It is narrow enough to appear suspended in the air. Designed by Luciano Bertocini, Thin-K is made entirely of metal, with external leg details and a top in aluminium, gloss or matt glass, and wood veneered aluminium - resistant, durable and completely recyclable materials. The textured finish of the aluminium top makes it smooth and pleasant to the touch. Fixed or extendable, the Thin-K table is available in various colours.

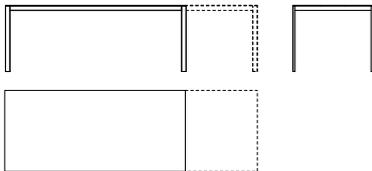

Bevor er ein Tisch wurde, war Thin-K vor allem eine technologische und formale

Herausforderung. An der Grenze des absoluten Minimalismus ist die Platte von Thin-K Top knappe 6 mm dick und kann beträchtliche Längen erreichen, ohne dabei an Linearität und Stärke zu verlieren, so dünn, um scheinbar in der Luft zu schweben. Der Tisch Thin-K nach einem Entwurf von Luciano Bertocini wird ganz aus Metall hergestellt, mit außenliegenden Details und Platte aus Aluminium, glänzendem oder mattem Glas oder aus Aluminium mit Holz furnier – alles widerstandsfähige, langlebige und vollständig recycelbare Materialien. Die leicht strukturierte Ausführung der Platte aus Aluminium machen diese angenehm glatt und berührungsfreundlich. Der fixe oder verlängerbare Tisch Thin-K steht in verschiedenen Farben zur Auswahl.

Más que una mesa, Thin-K es un desafío tecnológico y formal. Al límite del minimalismo absoluto, el sobre de Thin-K tiene un espesor de tan solo 6 mm y puede alcanzar longitudes considerables sin perder su linealidad y solidez, tan fino que parece suspendido en el aire. Diseñada por Luciano Bertocini, Thin-K está realizada totalmente en metal, con los detalles externos de las patas y el sobre de aluminio, cristal brillante o mate y aluminio chapado en madera: materiales resistentes, duraderos y completamente reciclables. El acabado gofrado del sobre de aluminio le confiere un aspecto liso y un tacto agradable. Fija o extensible, la mesa Thin-K está disponible en varios colores.

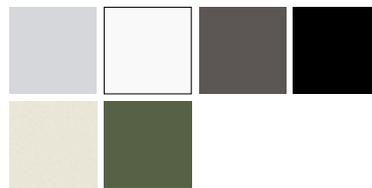

Avant d'être une table, Thin-K est un défi technologique et formel. Se distinguant par un minimalisme quasi absolu, le plateau de Thin-K n'a qu'une épaisseur d'à peine 6 mm et peut atteindre des grandes dimensions sans jamais fléchir ni perdre sa solidité. Il est si fin qu'il semble suspendu en l'air. Dessinée par Luciano Bertocini, Thin-K est entièrement réalisée en métal, avec face extérieure des pieds et plateau en aluminium, en verre brillant ou mat ou en aluminium plaqué bois – des matériaux résistants, durables et totalement recyclables. Le plateau en aluminium finition satinée est lisse et agréable au toucher. Fixe ou à rallonges, la table Thin-K existe en divers coloris au choix.
